JOB MARKET PAPER	<p><b>The Impact of Uber and Lyft on Taxi Service Quality: Evidence from New York City</b> (with Erik Johnson and Byung-Cheol Kim) <i>NET Institute Working Paper</i></p> <p><i>Abstract</i> Using detailed trip-level taxi and for-hire-vehicle data and new incident-level complaints data, we study how the entry of Uber and Lyft has affected the quality of taxi services in New York City. In a panel setting with 263 NYC taxi-zones over the time period from 2014 to 2017, we find that increased competition measured by the number of daily Uber/Lyft trips in a given taxi-zone has led to more complaints regarding a variety of service quality dimensions such as unsafe driving, rude behavior and fare refusal. Our results are robust to accounting for potential simultaneity in the determination of complaints and Uber and Lyft penetration.</p>	
OTHER WORKING PAPERS	<p><b>Price Discrimination and Salience</b> <b>Unintended Effects of Price-Match Guarantees</b> (with Byung-Cheol Kim) <i>under review at Information Economics and Policy</i></p>	
GRANTS	<p>NET Institute Summer Grant for “The impact of Uber and Lyft on taxi service quality: Evidence from New York” \$3,000, 2018 (with Erik Johnson and Byung-Cheol Kim)</p>
