SELECTED POLICY ENGAGEMENT: EVENT HOSTING

Co-Organizer, *Evidence-Based Programs for Environmental Compliance* webinars 2017 – 2018

This ongoing webinar series, hosted by EPA Office of Enforcement and Compliance Assurance and the Environmental Council of the States (ECOS), is a follow-up to the Jan 2017 workshop described below. The program helps environmental administrators at local, state, and federal agencies appreciate how collaboration with researchers can identify effective and measurable approaches for enhancing environmental compliance. Social and behavioral scientists from top research universities present research findings on innovative enforcement and compliance. Policy-makers discuss program initiatives that may be tested through collaboration with academic researchers. Each webinar in this series has been remotely ‘attended’ by dozens to hundreds of local, state, and federal agency representatives. The goal is to spur partnerships between regulators and scholars to enhance evidence-based environmental compliance oversight.

Co-Organizer, *Sustainability Officer Roundtables* 2016 – 2018

With UVA Darden faculty, these annual sustainable business roundtables bring together corporate sustainability officers from large multi-national firms and small groups of academics and policy practitioners for facilitated dialogue. Key themes include: (1) What can companies do to become leaders in sustainability innovation? (2) What should government policy makers do to encourage and incentivize sustainable business in the US? Corporate participants included executives from Intel, GE, Walmart, United Technologies, Campbell Soup, Lockheed Martin, Chemours, Lennox International, and others.

Co-Organizer, *Innovative Approaches to Foster Environmental Compliance* workshop Jan 2017

This workshop brought together regulators from federal, regional, and state agencies and a select group of academic scholars from a variety of disciplines for a constructive dialogue about how research can inform the pursuit of innovative approaches to foster environmental compliance. The topics centered on “Next Generation Environmental Compliance” initiatives. This free invitation-only workshop was organized and hosted by Katharine Abraham (UMD), Jay Shimshack (UVA), and Michael Toffel (Harvard Business School), in consultation with the US EPA Office of Enforcement and Compliance Assurance (OECA) and other EPA offices. Participants included scholars from Penn, NYU, Harvard, UC Irvine, and others, and practitioners included EPA Assistant Administrator, commissioners of several state EPAs, and others.

Co-Organizer, *Reflections on Responsible Regulation* March 2013

This Murphy Institute conference brought together law, economic, and business scholars to address the complexities of ‘responsible regulation.’ Goals were to facilitate: (1) insights relevant to regulation in general, regardless of area; (2) a scholarly dialogue about regulation transcending disciplinary boundaries. Participants included top scholars from top universities.
